Packaging Machinery Solutions for ging Machinery

Filling Inspection Wrapping Labelling

ABOUT CARLO GAVAZZI

Carlo Gavazzi Automation is an international group active in designing, manufacturing and marketing electronic equipment targeted at the global markets of industrial and building automation.

Our history is full of firsts and our products are installed in a huge number of applications all over the world. With more than 80 years of successful operation, our experience is unparalleled.

We have our headquarters in Europe and numerous offices around the world.

Our R&D competence centres and production sites are located in Denmark, Italy, Lithuania, Malta and the People's Republic of China.

We operate worldwide through 22 of our own sales companies and also selected representatives in more than 65 countries, from the United States in the West to the Pacific Rim in the East.

Our core competence in automation spans three product lines: Sensors, Switches and Controls.

Our wide array of products includes sensors, monitoring relays, timers, energy management systems, solid state relays, safety devices and fieldbus systems. We focus our expertise on offering state-of-the-art product solutions in selected market segments.

Our customers include original equipment manufacturers of packaging machines, plasticinjection moulding machines, food and beverage production machines, conveying and materials handling equipment, door and entrance control systems, lifts and escalators, as well as heating, ventilation and airconditioning devices.

DESIGNED TO MEET MARKET REQUIREMENTS

The growing markets in consumer goods and packaged pharmaceuticals drive the development of packaging equipment. Filling and sealing machines, also labelling and coding devices, are important to ensure product safety throughout the supply chain.

To meet these needs, the industry has gradually introduced more automation and more sophisticated electronic controls.

In today's packaging production lines, the different stages are completed in minutes rather than in hours, as compared to years past. In all types of packaging machinery - in all sectors of industry - each component must meet the strict requirements of the individual application.

This is to guarantee the continuity of production and the conformity of the packaged product to quality standards.

For many years, Carlo Gavazzi photoelectric, inductive and capacitive sensors have proven to be the best solution in applications for filling and checking.

In shrink wrapping applications, careful control of heating is essential for good results. Solid state relays are used to switch the heaters on and off in order to maintain the correct temperature.

The packaging industry also needs safety devices to guarantee the safety of the operators engaged in the work area, ensuring safe operation of the machines.

Carlo Gavazzi's comprehensive safety range includes products that detect intrusions within the non-safe zone/s and shut down the machinery in a controlled manner via standard and/or configurable safety modules.

Carlo Gavazzi products all offer easy installation, high precision and long term reliability.

Packaging Machinery

Photoelectric sensors	Photoelectric sensors	Inductive sensors	Ultrasonic sensors	Capacitive sensors	Capacitive level sensors	Conductive level probes
PD30ET PD30C	PA18 PH18	ICB12 ICB18 ICB30	UA18 UA30	CA18 CA30	CD34CNF	CLH CLD

Carlo Gavazzi offers a complete range of automation components for the packaging industry.

In a bottling line UA ultrasonic sensors are used to verify that the appropriate level of a product is in the container before it is sealed and shipped.

Ultrasonic sensors are also used to measure the level of ingredients – either liquid or solid – in a container. The continual analog output signal allows for better control of the process. The levels of solid material, such as ground coffee, coffee beans or flour, are accurately detected using photoelectric sensors.

The PA18/PH18 sensors come with a mounting bracket which allows

fast mounting and space saving. Axial, radial and square versions are available. An important benefit is that the conveyor can be cleaned much more easily.

For accurate control of the filling process, PD30 sensors provide an output signal when the product is at the appropriate fill level.

The PD30 stainless steel sensors are designed for wet as well as dry areas. The stainless steel housing and high-end plastic materials guarantee maximum resistance against IP69K and Ecolab cleaning processes.

Inspection

Photoelectric sensors	Photoelectric sensors	Inductive sensors	Ultrasonic sensors	Fiber optic amplifiers	Soft starters
PD30ET PD30C	PH18 PA18	ICB12 ICB18 ICB30	UA18 UA30	FA1	RSGD

Carlo Gavazzi products have many applications in the inspection-detection field. For bottling lines that have darker or less transparent bottles, PA18 through beam sensors can be used to detect the presence of the bottles. This family of products is from 40 % to 60 % smaller than existing housings.

The PD30 stainless steel (background suppression) sensors detect all colours on objects at the same distance from the sensor, and their durable design withstands daily cleaning processes. The specialised optics of the PD30CNG - combined with a reflector - are perfect for detecting clear bottles on a conveyor.

In some confectionery applications, it is

necessary to detect if a cake decoration is present or properly positioned. The PD30 diffuse sensor recognises the decoration on top of the cake.

The fiber optic amplifier FA1 and the series of fiber optic cables FUR & FUT offer even more flexibility for sensing. To verify that a bottle cap is present on the bottle a FA1 fiber optic amplifier with a fiber optic cable and lens are positioned above the bottles and programmed to detect the reflection from the bottle cap.

Wrapping and sealing

Machinery

sensors switches switches state contactors sensors sensors PD112 PD30CN **ECH RGS** RGC1S RGC3A **RGC** RGS1S RGC2A **RM**

Multiple bottles are often bundled together and shrink-wrapped. Carlo Gavazzi solid state relays (RM or RG series) allow fast switching of heaters that enable accurate control of the process temperature, thus maintaining an even shrink of the plastic wrap. Solid state solutions allow frequent switching without affecting the lifetime of the switch, unlike mechanical contactors. In order to verify that the shrink-wrap has been added, a PD30CNG clear object sensor is positioned to focus on the level of the bottle necks. If the shrink-wrap is present, the clear object sensor will have a continuous output as the package passes by.

Diffuse reflective photoelectric sensors with long detecting distance (PD112)

detect goods on a pallet to ensure that wrapping is stopped at the required height.

In hot-melt heating systems the high temperature ECH sensors have proven their capability and reliability.

Other applications include automatic continuous processes of thermoforming,

filling and sealing. The RG range offers a wide variety of solutions, starting from solid state switching of heaters to more sophisticated solutions that, apart from the switching function, integrate monitoring features that are able to detect load and system malfunctions to guarantee a reliable thermal process.

Labelling

amplifiers	sensors	fork sensors	Timers	
FA1	PC50	PF80	DAA51 DMB51	

Once a container is filled, the next step is to apply the appropriate label.

A fiber optic amplifier FA1 is used to detect the presence of a mark on a bottleneck label, which confirms that the bottle is in the correct position for the main label to be applied.

These sensors also detect the presence

of security bands which are required on many bottles and containers. They recognise the difference between the security band and the bottle cap.

The FA1 is compact and highly intuitive for easy setup. It is equipped with two 4-digit LED displays for clear and concise reading. An adjustable signal level, selectable response time and different timer functions provide full flexibility. Coupled with the robust and complete range of fiber optic cables FUR & FUT, this amplifier can be used in many applications.

Detection of labels, marks and double sheets, as well as holes and edges, are typical applications for the PF80 fork sensor

Precise control of all labels is an important part of the packaging process. The surfaces of the labels are often reflective and the photoelectric proximity sensors provide the necessary sensitivity for maximum reliability.

Photoelectric sensors

Photoelectric sensors

CERTUS

CM22D0A CM40D0A CM30D1A ESI

PD30ET PD30C PA18 PH18

Carlo Gavazzi's safety devices are used to prevent access to dangerous areas, until the machines are completely stopped. For example, the CERTUS configurable safety module offers up to 128 inputs and 16 pairs of programmable solid state outputs in a compact modular system, managing and monitoring at the same time safety sensors and commands such as: safety light curtains, photocells, emergency stops, two-hand controls, mechanical switches, laser scanners and safety mats.

Protection of the operators from dangerous moving parts of the machine is ensured by using our safety module CM22D0A, able to monitor multiple safety functions of industrial machinery.

With the configuration of the right delay time, by means of the hex-switch, and in combination with our electromagnetic safety interlock ESI, we can guarantee the safety of the operator, as the machinery remains operative for a short time after the stop signal, due to mechanical inertia of the moving parts.

Around the packaging machine photoelectric sensors (PD30, PA18 and PH18) are widely used to detect the position of the items to be packed and/or to detect the position of the carton box

When packaging products into a carton box, the boxes are stacked up unfolded on one side of the machine. Two photoelectric sensors are used: one

to detect that there are enough unfolded carton boxes in the pipeline, the other to detect when an unfolded carton box is ready to be fed into the packaging machine. If this box is not present then the stack of unfolded carton boxes is pushed forward until the sensor detects the first box.

Safety devices and energy efficiency

SMS **WM20 EM210** DPD02 **SPD SPUBC CLS** DPA01/DPB01 **SPPC SPUC** ET112 ET340 DIA/DIB/DTA **SPM**

Our safety magnetic sensors (SMS, CLS) are particularly designed for the safety gates that allow entry to machines with dangerous movements. Carlo Gavazzi offers a vast array of products to improve energy efficiency and to ensure the monitoring of entire processes.

Energy management components provide vital information for operators to identify consumption trends and take appropriate action. The WM20 power analyser, the EM210 energy analyser or the ET energy transducer can monitor all the main parameters of an electric line or load.

DPA01 monitoring relays monitor phase sequence and phase loss of motors: DPD02 and DPB01 also monitor mains over or under voltages. Overloads can be prevented with the DIA and DIB current monitoring relays whilst the DTAO4 relays detect and disable motors in case of overheating. Carlo Gavazzi timers - available in four different housings (standard DIN-rail, Plug-in, 48x48 and MiniD housing) provide correct and reliable solutions for every application.

The SPUC and the SPUBC modules guarantee power supply and electrical continuity in case of mains failure.

sensors

Photoelectric

Photoelectric sensors

Photoelectric sensors

Photoelectric sensors

PA18 / PH18

- Standard M18 cylindrical housing
- Power supply: 10 to 30 VDC
- Separate models available for NPN or PNP outputs
- Range: 1 m (Axial), 0.8 m (Radial)
- Sensitivity adjustment by potentiometer
 Approvals/Marks: CE cULus ECOLAB

PD30C

- World standard housing style 10.8 x 30 x 20 mm
- Power supply: 10 to 30 VDC
- NPN or PNP transistor output
- Sensitivity adjustment by Teach-in or by potentiometer
- Approvals/Marks: CE cULus (UL508, CSA C22.2)

PD30ET

- World standard housing style 11 x 31.5 x 21 mm
- Supply voltage: DC 4-wire
- Output: NPN/PNP NO+NC
- Sensor types: D, B, R, P and T
- Connectivity: Cable or M8 connectors
- Approvals/Marks: CE cULus (UL508, CSA C22.2) - ECOLAB

MAIN FEATURES

- Stainless steel housing AISI 316L
- Resistant to high-pressure washdown, and aggressive cleaning agents.
- IP67, IP68, IP69K, NEMA type 1, 2, 4, 4x, 5, 6, 6P
- Protection: reverse polarity, short circuit and transients

PC50

- Dimensions: 17 x 50 x 50 mm
- Sensing distance up to 20 m
- Modulated infrared light
- Make and break switching function selectable
- Cable and plug version
- Approvals/Marks: CE UL CSA

MAIN FEATURES

- Adiustable sensitivity
- High EMC immunity
- Protection: reverse polarity, short circuit and transients

MAIN FEATURES

- Complying with the requirements of ECOLAB, IP67, IP69K
- Approved according to UL508
- Diagnostic LED indication (green and yellow LED)
- Short circuit, reverse polarity and overload protection

Photoelectric

sensors

MAIN FEATURES

- Background suppression version, with accurate detection and PointSpot light
- Long detecting distances
- Protection: reverse polarity, short circuit and transients

Fiber optic amplifiers

Photoelectric fork sensors

Inductive sensors

PD112

- Dimensions: 25 x 45 x 112 mm
- Long range background suppression (BGS) sensor
- Power supply receiver: 10 to 30 VDC
- NPN and PNP NO or NC output
- Emitter with Mute Input for testing sensor fucntion
- 2.5 m sensing distance

FA1

- 2 x 4 digit LED display for signal and threshold level
- Easy setup 3 way adjustment switch
- Selectable response time, timing delay
- 100 mA NPN PNP NO NC Switching

PF80

- Dimensions: 12 x 37.5 x 80 mm. Slot width 3 mm
- Teach-In: push button or by wire
- Rated operational voltage 10-30 VDC
- Aluminium housing
- Approvals / Marks: CE

ICB12 / ICB18 / ICB30

- M12. M18 and M30 Nickel-brass housing in short or long barrel lengths
- Standard, double and triple distance sensing ranges
- Output functions: NO and / or NC, NPN
- Two metre oil resistant PVC cable or M12 plug version
- Protection: reverse polarity, short circuit, transients

MAIN FEATURES

- High precision and reliability thanks to the microprocessor technology
- Short circuit and overload LED indication
- Laser engraved information on the front cap, permanently legible

MAIN FEATURES

- Light beam approved to Safety Category 2
- UL325, UL508, EN12445, EN12453,
- Long detection range on black objects

MAIN FEATURES

- Varieties of through beam and reflective fiber optic cable
- Ø 0.25, 0.5 or 1.0 mm inner fiber diameter for different applications
- Extra overmoulding on fiber units for better fiber curvature protection

- High speed detection
- Detection of transparent material
- Detection of labels, marks and double sheets

Our product range				
Conductive level controllers / probes	Capacitive level sensor	Capacitive sensors	Capacitive sensors	
CLD / CLH	CD34CNF	CA18 / CA30	ECH	
 17.5 mm slim housing, 22.5 mm & 35 mm housing available Multiple filling and emptying functions 24-240 VAC/DC [CLD2EB1BU24]/24 VDC, 115 VAC, 230 VAC 	 Dimensions 8 x 16 x 34 mm Power supply: 10-30 DC Output: NPN / PNP / NO or NC Power supply from 208 to 480 VAC (+/- 15%) 	 4th generation Tripleshield™ technology Dimensions: M18 / M30 Plastic housing DC versions Sensing distance up to 30 mm Approvals/Marks: CE - cULus - ECOLAB 	 Sensor diameter: M30, teflon and stainless steel Adjustable sensing distance: 4 to 15 mm, factory set for 10 mm Output: transistor NPN or PNP, make & 	

MAIN FEATURES

electrodes [CLH5] Extendible probes for longer length

Wide operational supply voltage range

Flexible modular probes up to 5

- Slim compact housing
- \bullet Wide sensitivity adjustment 250 Ω to 500 ΚΩ
- Cascading amplifiers for more levels [CLP2FA]

MAIN FEATURES

• Detecting water-based liquids (up to 50 mS)

• Connectivity: Cable or M8 4-pin Pig-tail

Approvals/Marks: CE - cULus - ECOLAB

- Automatic adaption to tank wall thickness
- Eliminating influence from build-up or foam
- IP65, 66, 67, 68, 69K NEMA type 1, 2, 4, 4X, 5, 12
- · Protection: reverse polarity, short circuit and transients

MAIN FEATURES

- Highest EMC immunity
- ESD ratings up to 40 KV
- Sensing face temperature up to 120°C
- Best immunity towards Inverters

- nd
- 5
- break switching
- Power supply: 10 to 40 VDC

MAIN FEATURES

- Provided with a separate teflon sensor head in M30 for temperatures within the range of -196°C to +180°C
- Protection: reverse polarity, short circuit, transients

Ultrasonic PCB mount solid state 1-phase solid state 1-phase solid state sensors relays relays **switches**

UA18 / UA30

- Dimensions: M18, M30
- Ultrasonic sensors with integrated amplifier providing a digital and/or analog output
- Housing material: plastic and stainless
- Sensing distance up to 6 m
- Approvals/Marks: CE cULus CSA

RP1

- Dimensions: 25.4 x 43 x 10.5 mm
- Operational voltage range: 24-480 VAC
- Rated operational current: 3, 5, 5.5, 10 AAC
- Control input ranges: 4-32 VDC, 16-32 VAC
- Approvals/Marks: CE cURus VDE [RP1...3,5,6]

RM1.. / RAM1..

- Dimensions: 58.2 x 44.8 x 28.8 mm, panel mount
- Rated operational voltage: up to 660 VAC
- Rated operational current: 25, 50, 75, 100, 125 AAC
- Control input ranges: 4-32 VDC, 20-280 VAC
- Approvals/Marks: CE EAC cURus -CSA - CCC - VDE [RAM1]

RGS1A.. / RGC1A..

- Product width: 17.5 mm up to 70 mm, DIN or panel mount
- Ratings: up to 660 VAC, 90 AAC, 18000 A²s
- Integrated output overvoltage protection
- Control input ranges: 4-32 VDC, 20-275 VAC (24-190 VDC)
- Approvals/Marks: CE EAC VDE cULus [RGC] - cÚRus [RGS] - CSA [RGS] - GL (RGC up to 30 AAC)

MAIN FEATURES

- Excellent EMC performance and precision
- Detects clear, transparent and shiny targets, solid objects, liquid or granules.
- · Protection: short circuit, transient and reverse polarity

MAIN FEATURES

- Zero cross or random switching
- 4 kV isolation between input & output
- Accessories for DIN mount option available

MAIN FEATURES

- Zero cross or random switching
- Low noise emission EN55011 class B conformance [RM1A..L]
- Integrated over-voltage protection [RM1]

- Integrated heatsink [RGC1..], without heatsink [RGS1..]
- 100 kA short circuit current rating
- Optional overtemperature protection

1-ph solid state switches with current monitoring

3-phase solid state contactors

3-phase general purpose soft starters Variable frequency drives

RGS1S.. / **RGC1S..**

- Product width: 22.5 mm up to 70 mm. DIN or panel mount
- Ratings: up to 660 VAC, 90 AAC, 18000 A²s
- Integrated output overvoltage protection
- Control input range: 4-32 VDC
 Approvals/Marks: CE EAC cULus [RGC1S] - cURus [RGS1S] - CSA [RGS1S]

MAIN FEATURES

- Partial load failure detection (1/6)
- Monitoring for SSR and load circuit malfunction
- TEACH by local push button or remote

RGC3A.. / RGC2A..

- Product width: up to 70 mm, DIN-rail mounting
- Ratings: up to 660 VAC 75 AAC/pole [RGC2], 65 AAC/pole [RGC3] @ 40°C Motor ratings up to 11 kW @ 400 VAC,
- 25 HP @ 600 VAC
- Control input range: 5-32 VDC, 20-275 VAC (24-190 VDC)
- Approvals/Marks: CE cULus EAC CCC

MAIN FEATURES

- 3-phase; 2-pole [RGC2] or 3-pole
- [RGC3] switching
 Monitoring for SSR and load circuit malfunction [RGC..M]
- 100 kA short circuit current rating

RSGD

- Operational voltage range: 187-440 VAC, 187-660 VAC
- Operational current range: 12 AAC up 100 AAC
- Control voltage: 24 VAC/DC, 110-400 VAC
- Serial communication (Modbus 2-wire) (RSGD 75 mm models)
- Approvals/Marks: cULus CCC EAC

MAIN FEATURES

- Easy to use and set-up
- Self-learning algorithm to adapt to different loads
- Auxiliary relays for top of ramp and alarms

RVLF

- · Compact dimensions, with ratings up to
- Inbuilt V/F and SLV control
- Drive voltage ratings: 100-120 VAC; 200-240 VAC; 380-480 VAC
- Drive kW rating: 0.4 kW 11 kW (0.5 HP - 15 HP
- Approvals/Marks: CE cULuS

MAIN FEATURES

- Ease of use with minimal settings
- Precision low speed control with SLV algorithms
- Inbuilt filters on most models to reduce harmonics disturbance

Safety magnetic sensors and units

CERTUS configurable safety modules

CERTUS configurable I/O expansion modules

CERTUS speed monitoring modules

SMS / CLS

- Rectangular or cylindrical housing
- Several output configurations available
- Up to 175 VDC switching voltage
- 350 mA maximum output
- Up to 10 W switching power
- IP67 protection

MAIN FEATURES

- Rugged plastic or stainless steel housing
- Operating temperature: -25°C to 70°C
- Cable output or M12 pigtail connection
- Cylindrical or rectangular safety magnets

CMM

- 4 non-safety test outputs for sensor monitoring
- 2 non-safety programmable digital signal outputs
- 2 non-safety inputs for Start / Restart interlock and EDM
- file with 5 configuration LOG modifications
- Connection with other exp. units via rear bus

MAIN FEATURES

- Also usable as a stand-alone device, able to control any other expansion unit
- 8 safety digital inputs
- 2 safety OSSD pairs (400 mA Output)
- Certified to the highest safety levels: SIL 3, SILCL 3, PL e, Cat. 4, CE, TUV, cULus

C 1/O

- Wide range of Input/Output, Input only or Output only (both OSSD and standard relay) expansion units to serve different application requirements
- Models offer a variety of non-safety Inputs/Outputs such as: inputs for Start/Restart interlock and EDM, test outputs

MAIN FEATURES

- The models offer eight combinations:
 - 8 Inputs 2 Outputs; 12 Inputs 8 test Outputs
- 8 Inputs, 16 Inputs,
- 2 OSSD. 4 OSSD
- 2 relay Outputs, 4 relay Outputs

CES

- Exp. units to monitor speed (PL e): Zero speed, Max speed, Speed range, Motion direction; rotation / translation.
- RJ45 for encoder connections and terminal blocks for connection of proximity switches (up to 2 per module)
- Inputs frequency: Encoder up to 500 KHz (300 KHz for HTL), Proximity up to 5 KHz

- The modules allow the configuration of up to 4 speed thresholds for each logic output (axis)
- Each module integrates two logic outputs configurable via the MSD and is capable of controlling up to two independent axes

Certus multifunction safety module

Certus multifunction safety module

Electromagnetic safety interlocks

Multifunction monitoring relays with NFC

CM22D0A

- Up to 4 OSSD safety outputs
- 2 OSSD auxiliary outputs
- Safety solution for enhanced safety and high protection in inertia machinery
- Compact dimensions, 1 DIN, W x H x D: 18 x 90 x 63 mm

MAIN FEATURES

- Configurable pre-set delayed safety outputs, set via the hex-switch
- Can be used in applications with: e-stop, e-gate, limit switch, non-contact switch, safety light curtains, safety light beam, safety mat
- Cat.4 PL e (ISO 13849-1), SIL 3 (IEC 62061), SILc. 3 (IEC 61508)
- Approval by TUV
- Manual or automatic start selectable

CM40D0A / CM30D1A

- 4 OSSD safety outputs [CM40D0A]
- 3 OSSD safety outputs + 1 auxiliary output [CM30D1A]
- Safety solution for basic machines. equipment and production lines
- Compact dimensions, 1 DIN, W x H x D: 18 x 90 x 63 mm

MAIN FEATURES

- Can be used in applications with: e-stop, e-gate, limit switch, non-contact switch, safety light curtains, safety light beam, safety mat
- Cat.4 Ple (ISO 13849-1), SIL 3 (IEC 62061), SILCL 3 (IEC 61508)
- Approval by TUV
- Manual or automatic start selectable

ESI

- Improving safety for applications requiring access to remain closed and locked until potential hazards have stopped or come to a predetermined safe state
- Standards compliance. SIL 3 in accordance with EN 62061, PL e in accordance with EN ISO 13849-1, interlock type 2 in accordance with EN ISO 14119
- Approvals/Marks: CE cULus IMQ

MAIN FEATURES

- Ensures protection in inertia machinery
- Protects machines from interruptions
- Prevents entry into a dangerous area until the unlock signal
- Manual unlock device for emergency
- Block controlled by solenoid

DPD02

- Dimensions: 22.5 mm DIN-rail mounting enclosure
- 120 VAC to 480 VAC Delta & Star Mains
- Voltage and frequency monitoring
- 2 SPDT 8A relay outputs
- Approvals/Marks: UL CSA CCC

MAIN FEATURES

- NFC programming
- Up to 10 configurable setpoints
- Apps for Android and Windows PC programming

3-phase monitoring relays

Motor thermistor relays

Current monitoring relays

Current monitoring relays and Current transformers

DPA01 / DPB01

- Dimensions: 81 x 22.5 x 99.5 mm DIN-rail housing
- 3-phase monitoring relay for phase sequence and phase loss [DPA01]
- TRMS 3-phase over and under voltage, phase sequence and phase loss monitoring relays [DPB01]
- Approvals/Marks: CE UL CSA

DTA04

- Dimensions: 22.5 DIN Housing
- Motor thermistor relay
- PTC Open and PTC Short detection
- Universal power supply from 24 V to 240 VAC/DC
- Approvals/Marks: UL and CE approved

DIA53

- Dimensions: 81 x 17.5 x 67.2 mm DIN-rail housing with 12 mm hole for current measurement
- Current monitoring relay with built-in current transformer
- 20, 50 or 100 A full scale
- Self powered
- Approvals/Marks: UL CSA CCC

- Dimensions: 81 x 22.5 x 99.5 mm DIN-rail housing
- TRMS AC/DC over or under current monitoring relay
- Direct measuring or through current transformer [A82]
- A82: true RMS AC current metering transformer for 25, 50, 100, 250 or 500 AAC
- Approvals/Marks: ÚL ČSA

MAIN FEATURES

- 2 wire connection
- Knob adjustable setpoint
- Integrated solid state NPN PNP output

MAIN FEATURES

- Programmable latching or inhibiting at
- LED indication for relay, alarm and power supply ON
- A82: easy interface to PLC or setpoint

MAIN FEATURES

- Selection of measuring range by DIPswitches [DPB01]
- Detects when all phases are present and have the correct sequenc [DPAO1]
- LED indication for relay, alarm and power supply ON

- with Multicolour LED alarm discrimination
- Auto or manual, local or remote reset, test function
- Ready for reset function

3-phase power analysers

Energy analysers

1 and 3-phase energy transducers

Timers

WM20

- 96 x 96 mm panel mounting housing
- Accuracy 0.2 % (voltage, current)
- Class 0.5S (kWh)
- Universal power supply
- Front protection degree IP65, NEMA4X, NEMA12
- Approvals/Marks: cULus

EM210

- 3-phase energy meters with CT connection
- Solid or split-core 5 A CT
- Dimensions: 4 DIN modules or 72 x 72 mm housing
- Class 1 (kWh) acc. to EN62053-1
- Class B (kWh) acc. to EN50470-3
- Pulse open collector or serial RS485 outnut

ET112 / ET340

- 2 DIN size; DIN-rail mounting [ET112]
- 3 DIN size; DIN-rail mounting [ET340]
- Measurement of voltage, current, power, power factor and frequency
- Bi-directional energy metering, 2 tariffs, cl. 1 (EN62053-1)
- Measuring inputs: 115/230 VAC, 100 A [ET112], single phase
- Measuring inputs: 208 to 400 Vil VAC, 65 A [ET340], 3-phase

DAA51 / DMB51

- Dimensions: 81 x 17.5 x 67.2 mm DIN-rail housing
- Delay on operate function [DAA], multifunction [DMB]
- Combined AC and DC power supply
- Repeatability: < 0.2%
- Approvals/Marks: UL CSA RINA

MAIN FEATURES

- Provides installation data to a SCADA to manage the whole system
- Modular housing to build the instrument according to real application needs
- Modbus, Ethernet, Profibus, BACnet (IP and MS/TP) communication ports

MAIN FEATURES

- Very compact and space saving meter
- Can be installed both on DIN-rail or on the panel
- MID annex D certification available
- Approvals/Marks: CE cULus

MAIN FEATURES

- Self-powered
- RS485 Modbus port (screw, 2x RJ45)
- Optical port
- Sealable terminal covers
- (F

MAIN FEATURES

- Delay on operate/release; interval (manual/automatic start);
- Double interval; symmetrical recycler (ON or OFF first)
- Timing range from 0.1s to 100h

DIN-rail switch mode power supplies

Low profile power supplies

Metal enclosed power supplies

DC UPS

SPD

- DIN-rail mounting1-phase (5-480 W), 2-phase (100 W), 3-phase (120-960 W)
- Rated input voltage: 85-264 VAC (1-phase), 380-575 VAC (2-phase), 340-575 VAC / 480-820 VDC (3-phase)

 • Approvals/Marks: CE - TÜV - cULus -
- UL1310 Class 2 (<92W), ISA12.12.1 Class 1, Div 2

MAIN FEATURES

- Power Factor Correction (PFC)
- Parallel connection
- DC OK output

SPM

- Compact DIN-rail housing 1/3/4/5 Din width
- Universal input from 90-264 VAC
- Integrated short circuit and overload protection with built-in input filters

Compact design for installation

within distribution box with ratings up

Intuitive visual and electrical indications

Selected models comes with UL 1310

High effiency of up to 89%

MAIN FEATURES

Class 2 classification

to 100 W

Approvals/Marks: CE - cULus - TUV

SPPC

- Output power from 25 W to 800 W
- Input 110/240 VAC single phase
- Short circuit, overload and overvoltage protection
- PFC function available >75 W
- Approvals/Marks: CE UL

SPUC / SPUBC

- Power supply, UPS and battery charger "All in one" [SPUBC], UPS controller [SPUC]
- 12 or 24 VDC 5 A output (up to 30 A SPUC)
- Power boost up to 2 times rated output, permanent [SPUBC]
- Built-in battery status, complete diagnosis [SPUBC]
- Approvals/Marks: CE UL

MAIN FEATURES

- Adjustable output +/- 10%
- Compact dimensions
- Wide operating temperature range up to 70°C

- · Power supply independent from charger [SPUBC], to be used in addition to 12 or 24 V power supply [SPUC]
- Remote indication for battery operation and battery low
- "Start from battery" and "Empty battery charging" features [SPUBC]
